

RDM Cars

7 year financing options **Buying a car just became profitable!**

We show you how to
use 1/2 of what you can afford spend to buy
& get your car for FREE!!!
(Mirror Option)

Notice:

This financing package is designed for our economically astute clients who are willing to consider innovative financing options. By utilizing secured, "A" rated institutional quality assets, we offer you the opportunity to buy fine automobiles and other leisure TOYS while preserving or improving your net worth.

The rest of you – hang in there. It's coming!

How this got started.

Recently, a client came by to order a 427 Cobra. As his list of accessories grew, I suggested that he might keep in mind his target price for the car. He said: "It's not about the price, Richard, it's all just a function of time. In time, this car will only cost me a token dollar. In fact, I will end up worth more than when I started." I asked him what he meant and by the time he was done with his explanation and I was done with my questions I recognized great possibilities.

When I asked him how he ever came up with this he just smiled and said: "I found out what AIG and Warren Buffett are doing with their money, and why."

I then asked him if he would be willing to help my other clients do the same thing. What follows is the result.

This is not for *everybody*; but then, Cobras, Ferraris and Lamborghinis were never meant to be for *everybody* either.

Three Options - \$80,000

Traditional Option

Cash in = \$80,000

Cash out = \$0

Net Cost = \$80,000

Margin Option

Cash in = \$104,000

Cash out = \$80,000

Net Cost = \$24,000

Mirror Option

Cash in = \$160,000

Cash out = \$160,000

Net Cost = \$0

Wealthy people (Margin and Mirror) have learned to get what they want and preserve their principal. The nouveau rich (Traditional) get what they want and end up toy rich and principal poor. Choose wisely.

Traditional Option

Traditionally, if you want an \$80,000 car you pay \$80,000 and receive the car.

RDM-S

Now RDM Cars offers a more profitable way to own your next sports car.

Margin Option

This Option is a hybrid. While cash pays for the Ferrari, an equal amount of cash is drawn on margin and used to purchase "A" rated, sum capital institutional grade paper. The paper matures in 2 to 7 years and is purchased at an average discount of 50% of face (much like zero coupon bonds). Your final payout equals the car's purchase price. The net return is reduced by interest payments on the margin account.

Price:	\$80,000
Cash required:	\$80,000
Margin account:	\$80,000
\$80K to paper =	\$160,000 face value
Margin % payments =	@24,000
Face at maturity =	\$160,000
Minus loan and % =	\$56,000

Your \$80K Ferrari just cost you \$24K

Mirror Option

The Mirror Option places equal amounts of cash into your Ferrari and into the institutional grade paper. Since there is no debt service, the payout completely off-sets the purchase price. You drive your Ferrari for 5-7 years and end up with all your money back.

Price:	\$80,000
Cash required:	\$160,000
Car payment:	\$80,000
\$80K to paper	= \$160,000
Face at maturity	= \$160,000
Face minus \$80K payment	= \$80,000
Net out-of-pocket	= \$0

Your \$80K Ferrari just cost you \$0.

Three important questions

- Which vehicle/leisure toy do I want?
- How much do I want to spend?
- Which option will work best for me?
